

# Prepare for disaster.

Affordable testing and training, designed for you,  
to ensure everything works as planned.

## Disaster Recovery Plan Validation

Disaster Recovery testing is hard to do, hard to get right, and constantly a moving target.

Platform Lab will provide short term physical access to IT infrastructure necessary at outstanding value so your firm can validate it has a viable disaster recovery plan.

### **Do you *know* your plan will work?**

More than 60 firms in and around Ohio leverage Platform Lab's services to affordably validate that they can recover their systems and data in the event of a crisis.

### **Why use Platform Lab for Disaster Recovery testing?**

- Fulfill HIPAA and SOX regulations
- Thoroughly document procedures without time constraints
- Build depth to your recovery team
- Troubleshoot your plan prior to visiting your hotsite
- Exercise your plan locally, avoiding travel cost, hassle and risk
- Test 24/7/365 at your convenience
- Revisit what did not work after visiting your hotsite
- Non-profit cost structure provides for outstanding value

### **Where is Platform Lab located?**

There are DR test facilities in Columbus, Cleveland, Cincinnati and Toledo. If you cannot make it to a Platform Lab location to conduct a test, we will deliver and setup our hardware at your location.

### **What does it cost to use Platform Lab?**

We provide the best value for any organization, anywhere to conduct DR exercise validation. The cost of use is based on a per device fee. Please contact us with your specific needs to receive a custom quote.
