

Valuable testing.

Affordable testing and training, designed for you,
to ensure everything works as planned.

Platform Lab 2009 Price Card

Our Platform Lab experts are happy to build your custom configuration, exactly to your specifications.

Platform Lab has strong relationships with numerous hardware and software vendors throughout the United States. If you require additional resources not found on our current inventory, please contact us in advance so that we have time to acquire the required resources to meet the specific needs of your project.

Cost of configuration – load/stress testing

EXAMPLE: Five hardware devices – consisting of in-stock load driving servers and network devices – with operating systems and selected software configured to your specification at any of the four Platform Lab locations for approximately **\$2,400 per week** plus appropriate bandwidth and software charges, per client specification. Platform Lab can acquire software on demand for a variety of load test applications; however 100% of any cost incurred is passed along to the client.

Cost of configuration – disaster recovery plan evaluation

EXAMPLE: Nine hardware devices – consisting of most in-stock servers, tape drives, storage and network devices – with operating systems and selected software, configured to your specification at any of the four Platform Lab locations for approximately **\$3,600 per week**. Platform Lab will also deliver a test Lab environment to a client site at a moderate delivery charge.

Cost of configuration – proof-of-concept

EXAMPLE: 12 hardware devices – consisting of in-stock servers, storage and network devices – with operating systems and selected software, configured to your specification at any of the four Platform Lab locations for approximately **\$5,600 per week**. Platform Lab can acquire hardware and software on demand for a variety of proof-of-concept evaluations; however 100% of any cost incurred is passed along to the client. Platform Lab will also deliver a test Lab environment to a client site at a moderate delivery charge.
