

Pass the Stress Test.

Affordable testing and training, designed for you,
to ensure everything works as planned.

Scalability and Load/Stress testing at Platform Lab

Smart businesses realize they can lose revenue to competitors if their online sales channel is not functioning to the expectations of the consumer.

Organizations with a true commitment to quality invest the time, effort and resources into validation that their solutions and processes will work as expected. Firms that test gain the competitive advantage of knowing what will work and what will not work.

Platform Lab load testing is available to any firm, anywhere. The flexibility of the bandwidth availability and the ability for Platform Lab to deploy test environments on-demand allows Platform Lab to be the national value leader for load testing. The agreements in place with the various load test software partners allow Platform Lab to provide our clients a competitive advantage.

Massive bandwidth capability – Platform Lab has over a Gigabit of Internet connectivity allocated per Megabit, per day, per client at the best value in the industry.

Flexibility – Platform Lab can provide bandwidth for purpose of testing in per Mb per day or per hour increments, and client may request varying bandwidth for every day of their test. Platform Lab will drive bandwidth from the Platform Lab Load Test Cloud to the client existing - production or beta - website or build the web application or client/server environment at Platform Lab and the infrastructure to drive load against it.

Cost effectiveness – As a non-profit, Platform Lab can allocate the hardware and bandwidth at the best value in the nation. Our variety of load test software offerings ensures a correct price and performance point on a per client basis.

Partnerships – Platform Lab has partnerships in place with 14 software firms to provide our clients with the best selection of capabilities and price points for load test testing.

AccordSQA/SmarteSuite	AutomatedQA/Test Complete	Borland Silk Performer
Compuware/QA Load	HP Software/Mercury Suite	IBM Rational
