**CareWorks Technologies Acquires Security And Network Management
Company**
*IT Company to Offer Comprehensive Low Cost Network Monitoring Solutions
for Businesses*

COLUMBUS (May 28, 2009) – CareWorks Technologies is pleased to announce that it acquired Plannet Group today.

The acquisition will enable CareWorks, a member of the CareWorks Family of Companies, to provide clients with an affordable turnkey network and security management platform. Plannet Group’s enterprise-grade technology gives business owners immediate access to their networks with real-time data displaying vital metrics (from the application to the endpoint) and complete reporting and alerting capabilities.

“Business information must be secure and accurate at all times,” said Todd Cameron, President of CareWorks Technologies. “Joining forces with Plannet Group enables us to offer virtually any company protection from network sabotage, malicious behavior, or user error.”

“We take network management seriously and believe that businesses deserve an affordable way to remove the pain of network risk,” added Jim Mazotas, Founder and CEO of Plannet Group. “By leveraging our unique services with CareWorks’ exemplary reputation we’ve created a clear path to success for our customers.”

Plannet Group will move from Hilliard to CareWorks’ corporate office in Dublin. Both companies are privately held.

About CareWorks Technologies

CareWorks Technologies is a world-class Information Technology organization that uniquely delivers exceptional solutions.
